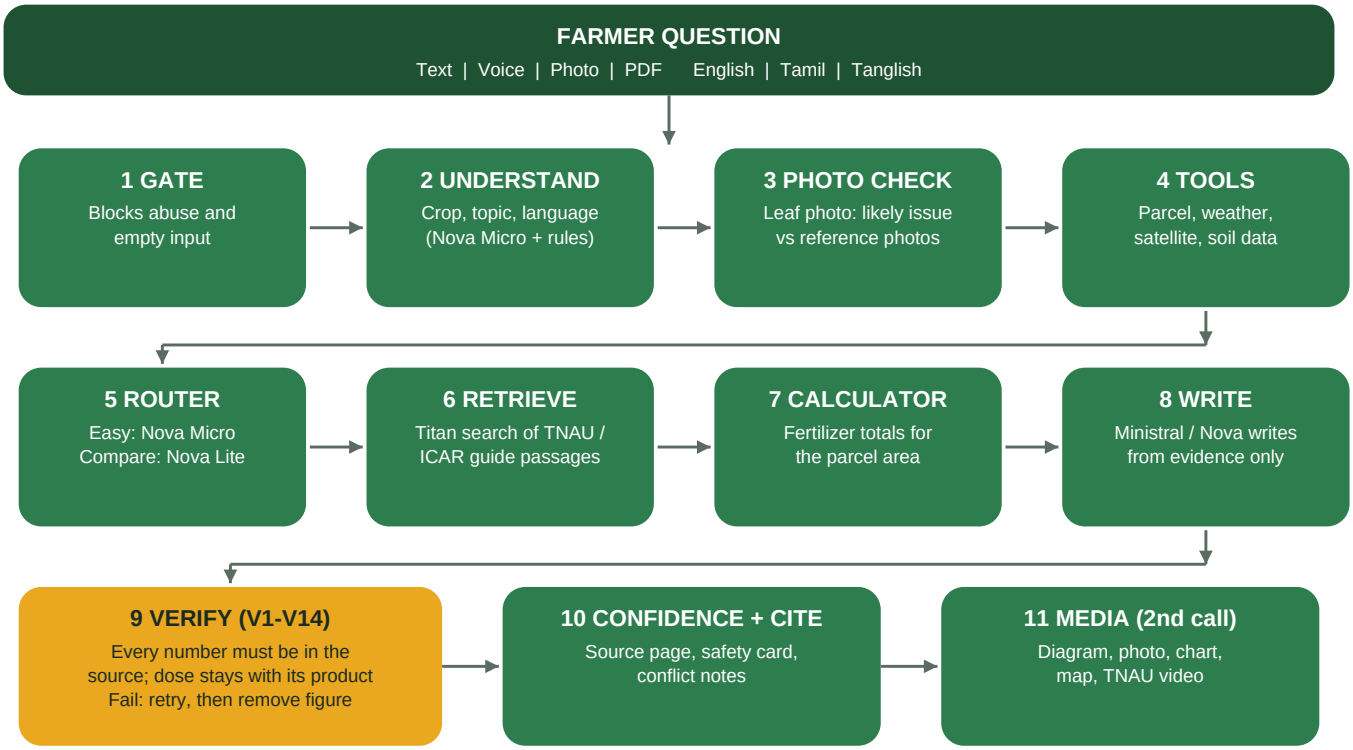
# Cropsy pipeline: how every question is answered

Green boxes do a job. The gold box is the safety check: no figure is shown unless it is in the source.



**Text answer is shown first. Media loads after, so the farmer never waits for pictures.**

Models (AWS Bedrock, ap-south-1): Nova Micro / Lite, Ministral 3B / 8B, Titan embeddings. Textract reads PDFs.

Why: cheap models first (cost), TNAU/ICAR evidence only (trust), calculator for arithmetic (accuracy), verifier for every number (safety), media after text (speed).
